By Harris Hancock : Lectures On The Theory Of Elliptic Functions the jacobi elliptic functions are standard forms of elliptic functions the three basic functions are denoted cn , sn , and dn where k is known as the modulus. The concept of number and algebra was further extended by the irish mathematician william hamilton whose 1843 theory of quaternions a 4 dimensional number system Lectures On The Theory Of Elliptic Functions:

This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections
